

WHAT DO I DO IN THE EVENT OF A CYBER-ATTACK?

WHEN IT COMES TO
CYBER-ATTACKS,
EVERY SECOND
MATTERS

Prevention, unfortunately, has its limits. **Cyber fraud, ransomware, data leaks, and hacking** are now realities of modern businesses, large or small.

How should you react **in the minutes, hours, and days following an incident?** How do you make sure that no evidence is compromised along the way?

Given how infrequently these situations arise, your team most likely does not feel equipped to deal with serious incidents of this nature. That's why **Forensik is here to help you quickly manage cyber-attacks** that have preyed on your business.

01

LIMIT THE DURATION AND IMPACT OF AN ATTACK ON YOUR COMPUTER SYSTEMS

In case of an incident, our *Cyber-Attack Response Service* gives you **24/7 access to our specialized intervention team**. Our incident management center will be at your service within a maximum delay of **two hours from the moment you contact us**.

03

GET PREFERENTIAL PRICING

For as little as **\$1,500 a month**, enjoy a preferential rate reserved for clients who subscribe to a **three-year service** term in advance.

02

ENJOY ACCESS TO CUTTING-EDGE EXPERTISE

Our specialists are equipped with **top-of-the-line technology** to defend you against the most sophisticated of attacks. By subscribing to our *Cyber-Attack Response Service*, rest assured that you have an elite team by your side, armed with the latest tools and software.

04

REINVEST YOUR BALANCE TOWARDS PREVENTION

No incidents this year? No problem. On top of having access to our elite team, you possess the ability to **reinvest your cyber-attack account balance** towards prevention in order to further reduce the risk of an incident.

Forensik's *Cyber-Attack Response Service* prepares your business for the worst-case scenario, while giving you the freedom to remain flexible with your investment.
